## Project

### Threads of Artisans

Threads of Artisans is an online shopping platform built using the MERN stack to empower local artisans across India. The platform brings traditional craftsmanship to the digital marketplace by offering a curated collection of handcrafted, one-of-a-kind products. It bridges the gap between artisans and modern buyers through a seamless shopping experience, promoting India's cultural heritage while supporting small artisan businesses.

#### Key Features:

- Fully responsive modern UI for smooth user experience
- Dynamic product catalog with artisan-made collections
- Secure user authentication & authorization
- Cart management and order workflow
- RESTful APIs with Express & Node.js
- MongoDB database for storing users, products, and orders
- Clean and scalable frontend built using React
